EDUCATION

STATE PROFESSIONAL COLLEGE

2014-2017 | System Administrator | With Honours

SCHOOL

2005-2014 | Mandatory Education

SKILLS

- Showing the level of knowledge with **stars** or **percentages** is **not** correct. Because we can't easily rate something that's constantly changing and improving.
- So, I **created** the bars which has some levels, in order to viewer can easily see what I can do.
- However, my real work given in my [Portfolio](#)
- Anyway, I used them that **Resume** to look good

LEVEL DESCRIPTION

level 1 - Basic User
can understand basics, especially very common and familiar aspects.

level 2 - Elementary User
creates simple things, understands the main of that technology, but still needs help in some cases.

level 3 - Intermediate User
can create proper things, understands other works, can create the same version of other templates, even though it takes him/her more time to finish it.

level 4 - Independent User
can deal with most situations, confident to find efficient solutions and does things as required or asked.

level 5 - Proficient User
produces clear, well-structured and awesome things, almost knows everything related to that technology or software.
